Submersible Pump

STP2-480DW

The pump is suitable for:

- Total emptying after water leakage
- Total emptying of containers after cleaning
- Total emptying of swimming pools
- Emptying of concrete decks
- Emptying low-lying construction sites

STARING STP2-480DW is a traditional submersible pump which is also suitable as "water sucker". STP2-480DW, a compact lightweight pump with high efficiency, which is made in an epoch-making design with fixed bottom that enables the absorption of water residues down to 1.0 mm water level.

Contra/flap valve on the suction side makes the water does not return even if the pump is stopped.

The bottom is provided with a rubber plate, so that the pump does not damage/scratch the surface it is placed on.

The outlet on the pump can be reversed as follows, that the outlet is perpendicular to the pump. This is a great advantage when the pump is placed on floor. This prevents the hose from kinking.

The pump is supplied with thermal fuse, 10 m rope, hose connector mounted on 1" thread, where storz coupling can also be mounted, and 10m. cable with approved impact-resistant connector.

MODEL	STP2-480DW	STPE2-480DW ELECTR. SWITCH	STP2-480DW SET BOX
Staring no.	STP2-480DW	STPE2-480DW	STP2-480 S/ET BOX
Outlet size (inches)	2"		
Volts (gV)	230		
Hz	50		
Motor kW	0,48		
Motor BHP	0,5		
Max. lift height (m)	11		
Max. capacity (L/min.)	170		
Weight (kg)	14		
Cable lenght (m)	10		

ABLE TO REMOVE WATER **DOWN TO 1 MM**
